

Effective Infection  
Control Made Simple....

# Azoxone™ DT 100

## Azithromycin Dihydrate (100 mg) Tablet

- ▶ Commonly used in respiratory, ENT, and skin infections.
- ▶ Once-daily dosing ensures better patient compliance.
- ▶ Short course therapy with long tissue half-life.
- ▶ Penetrates well into infected tissues.
- ▶ Widely prescribed in pediatric patients.
- ▶ Generally well tolerated with a good safety profile.
- ▶ Promotes better meal tolerance and reduces post-meal discomfort.
- ▶ Broad-spectrum macrolide antibiotic effective against many gram-positive and gram-negative bacteria.
