

# The winning pair in Type II Diabetes

## Gimtype<sup>TM</sup> -M4 Forte Tablets

Glimepiride (2mg) + Metformin (1000mg)  
SR Bilayered Smart Tablet

- 💧 **Metformin:** Metformin SR reduces a steady blood level of drug throughout the day.
  - Decreases glucose production & intestinal absorption of glucose by increasing peripheral glucose uptake & utilization.
  - Improves hepatic & peripheral tissue sensitivity to insulin.
  - Supports direct cardiovascular effects.

- 💧 **GLIMEPIRIDE :** Reduces blood glucose levels by correcting both defective insulin secretion & peripheral insulin resistance

For improved  
**glycemic** control
