

Information For the User
Oseltamivir Phosphate (12mg) Suspension

Slideflu Suspension

Brand Name: Slideflu Suspension

Dosage Form: Suspension

Composition:

Each 5 ml contains:

- Oseltamivir Phosphate IP equivalent to Oseltamivir 12 mg

Description:

Slideflu Suspension contains Oseltamivir, an antiviral agent indicated for the treatment and prophylaxis of influenza infections. It helps in inhibiting viral replication and reducing the severity and duration of influenza symptoms when administered early in the course of infection.

Indications:

Indicated for:

- Treatment of acute, uncomplicated influenza A and B infections
- Prophylaxis of influenza A and B in high-risk individuals, as prescribed

It helps in reducing fever, body aches, respiratory symptoms, and the duration of influenza illness.

Dosage & Administration:

Dosage should be as directed by the physician.

Shake well before use.

Use a calibrated measuring cup or spoon for accurate dosing.

Initiate treatment preferably within 48 hours of onset of symptoms.

Pharmacological Action:

Oseltamivir is a neuraminidase inhibitor that interferes with the release of newly formed viral particles from infected cells, thereby limiting viral spread within the respiratory tract.

Side Effects:

Generally well tolerated.

Occasionally, nausea, vomiting, abdominal pain, or headache may occur.

Precautions & Warnings:

- Use with caution in patients with renal impairment
- Monitor for neuropsychiatric symptoms, particularly in pediatric patients
- Use under medical supervision
- Do not exceed the recommended dosage

Drug Interactions:

No clinically significant drug interactions have been reported when used as directed.

Storage:

Store below 25°C in a cool, dry place.

Protect from light and moisture.

Keep out of reach of children.
