

Information For the User
Tobramycin (0.3% w/w) Eye Ointment

Tobraxyle Eye Ointment

Brand Name: Tobraxyle Eye Ointment

Dosage Form: Eye Ointment

Composition:

Each gram contains:

- **Tobramycin 0.3% w/w**
-

Description:

Tobraxyle Eye Ointment contains **Tobramycin**, an aminoglycoside antibiotic used for treating bacterial infections of the eye. It provides targeted antimicrobial action and helps reduce redness, swelling, and irritation associated with infection.

Indications:

Indicated for the treatment of:

- Bacterial conjunctivitis
- Blepharitis
- Other superficial ocular bacterial infections

It helps in **eliminating susceptible Gram-negative and Gram-positive bacterial eye infections**.

Dosage & Administration:

Apply as directed by the physician.

The ointment should be applied into the conjunctival sac. Avoid touching tube tip to eye surface.

Pharmacological Action:

Tobramycin works by inhibiting bacterial protein synthesis, resulting in bacterial cell death and infection control.

Side Effects:

Generally well tolerated. Mild eye irritation or temporary blurred vision may occur in some patients.

Warnings & Precautions:

- For ophthalmic use only.
 - Avoid contact with contaminated surfaces.
 - If irritation or hypersensitivity persists, discontinue and consult a physician.
-

Drug Interactions:

Concurrent use with other topical ophthalmic antibiotics should be done only under medical supervision.

Storage:

Store below **25°C**. Protect from freezing, light, and moisture.
Keep out of reach of children.
