

Information For the User
Zinc Gluconate (20mg) Syrup

Zincovora Syrup

Brand Name: Zincovora Syrup

Dosage Form: Syrup

Composition:

Each 5 ml contains:

- Zinc Gluconate IP equivalent to elemental Zinc 20 mg

Description:

Zincovora Syrup contains Zinc Gluconate, an essential trace element required for normal growth, immune function, and enzymatic activity. It helps in the prevention and treatment of zinc deficiency and supports immune response and overall metabolic functions.

Indications:

Indicated for the treatment and prevention of:

- Zinc deficiency states
- Nutritional supplementation during growth periods
- Immune support during infections
- Delayed wound healing

It helps in improving immunity, supporting normal growth and development, and maintaining healthy skin and mucosal integrity.

Dosage & Administration:

Dosage should be as directed by the physician.

Shake well before use.

Use a calibrated measuring cup or spoon for accurate dosing.

Pharmacological Action:

Zinc is an essential micronutrient involved in numerous enzymatic reactions, protein synthesis, cell division, and immune modulation. Supplementation helps restore normal zinc levels and supports physiological functions.

Side Effects:

Generally well tolerated.

Occasionally, nausea, vomiting, or mild gastrointestinal discomfort may occur.

Precautions & Warnings:

- Do not exceed the recommended dose
- Use with caution in patients with renal impairment
- Prolonged use should be under medical supervision

Drug Interactions:

Concomitant administration with tetracyclines, quinolones, or iron preparations may reduce absorption; maintain an appropriate dosing interval.

Storage:

Store below 25°C in a cool, dry place.

Protect from light and moisture.

Keep out of reach of children.

Manufactured in India for:

Cafoli Lifecare Pvt. Ltd.
