

Information For the User
Formoterol (6mcg) + Fluticasone Propionate (100mcg) Inhaler

Flutialfa F 100 Inhaler

Brand Name: Flutialfa F 100 Inhaler

Dosage Form: Inhaler

Composition:

Each metered dose contains:

Formoterol Fumarate 6 mcg

Fluticasone Propionate 100 mcg

Therapeutic Segment:

Respiratory Care / Anti-Asthmatic Segment

Therapeutic Indication:

Indicated for the treatment and maintenance of asthma and chronic obstructive pulmonary disease (COPD).

It helps in improving airflow, reducing airway inflammation, and preventing asthma attacks and bronchospasms.

Mechanism of Action:

- **Formoterol** is a long-acting β_2 -adrenergic agonist (LABA) that relaxes bronchial smooth muscles, providing prolonged bronchodilation.
- **Fluticasone Propionate** is a corticosteroid that reduces inflammation and mucosal swelling in the airways, helping prevent wheezing and shortness of breath.

Dosage & Administration:

- Administer by oral inhalation only.
- Usual recommended dose: 1–2 inhalations twice daily or as directed by the physician.
- Rinse mouth with water after each use to prevent oral candidiasis.

Contraindications:

- Hypersensitivity to Formoterol, Fluticasone, or any component of the inhaler.
- Primary treatment of acute asthma attacks or status asthmaticus.

Warnings & Precautions:

- Use with caution in patients with cardiovascular disorders, diabetes, or thyroid disease.
- Do not exceed the recommended dosage.
- Regular monitoring of asthma control is advised.

Side Effects:

- Common: Throat irritation, hoarseness, headache, tremor, and cough.

- Rare: Palpitations, oral candidiasis, or hypersensitivity reactions.

Storage:

Store below 30°C.

Protect from moisture, direct sunlight, and heat.

Replace the cap tightly after each use.

Packaging:

Flutialfa F 100 Inhaler is available in a metered-dose canister with a mouthpiece delivering 120 actuations.

Schedule:

Schedule H1 Drug – To be sold by retail on the prescription of a Registered Medical Practitioner only.
