

Information For the User
Budesonide (200mcg) + Formoterol (6mcg)

Buditerm F 200 Capsule

Buditerm F 200 Dry Powder Capsule for Inhalation (Rotacaps)

Composition:

Each capsule contains:

- **Budesonide 200 mcg** (Inhaled corticosteroid)
- **Formoterol 6 mcg** (Long-acting beta-agonist - LABA)

Description:

Buditerm F 200 is a **dual-action inhalation therapy** designed for the **management of asthma and chronic obstructive pulmonary disease (COPD)**. It combines:

- **Budesonide**, a corticosteroid that **reduces airway inflammation** and prevents flare-ups.
- **Formoterol**, a bronchodilator that **relaxes airway muscles** for easier breathing.

Indications:

- **Maintenance treatment of asthma**
- **Chronic Obstructive Pulmonary Disease (COPD)**
- **Prevention of asthma attacks and breathing difficulties**

Dosage & Administration:

- **Use as prescribed by a healthcare professional.**
- **Capsule should be used only with a Rotahaler/DPI device.**
- **Do not swallow the capsule.**

Contraindications:

- **Hypersensitivity** to Budesonide or Formoterol.
- **Not for relief of acute asthma attacks.**

Warnings & Precautions:

- **Not a rescue medication** for sudden breathing problems.
- **Rinse mouth after use** to prevent oral thrush.
- Use with caution in **patients with heart conditions or high blood pressure.**
- Consult a doctor if **pregnant or breastfeeding.**

Side Effects:

- **Mild throat irritation or cough**

- **Headache or dizziness**
- **Increased heart rate (tachycardia) (rare)**
- **Oral thrush or hoarseness**

Storage Instructions:

- Store in a **cool, dry place** away from moisture.
- **Keep out of reach of children.**
