

Strengthens the bone to prevent destruction

Calostyle™ Kit

A. Ibandronate Sodium Monohydrate 150mg

B. Calcium Carbonate I.P. 500mg + Vitamin D3 I.P. 500 IU +
Zinc Sulphate Monohydrate I.P. 7.5mg **Tablets**

- **Ibandronate Sodium Monohydrate** : A potent, new-generation, nitrogencontaining bisphosphonate effectively inhibits osteoclast-mediated bone resorption

- An effective & generally well tolerated bisphosphonate that offers an alternative to other bisphosphonate that offers as a first-line treatment for postmenopausal osteoporosis.

- Reduces bone resorption & enhances mineralization resulting in an increase in bone mineral density.

- **Calcium carbonate**: Provides the highest amount of elemental calcium. Well absorbed and well-tolerated specially when taken with a normal meal

- **Vitamin D3** : Essential for normal bone growth and development Is a crucial co-regulator of bone growth & remodeling, neuromuscular function, inflammation, proliferation, differentiation & apoptosis of cells.

- **Zinc** : Stimulates cell proliferation & mineralization in osteoblast, promoting bone formation.

Indications

☐ Lactation

☐ Osteoporosis

☐ Fractures

☐ Pre/post menopausal
