

Combination for Complete wellness of Bones

CalostyleTM

Calostyle-Plus Calcitriol 0.25 mcg + Calcium Carbonate 500 mg + Zinc 7.5 mg + Magnesium **Softgel Capsules**

Calostyle CT Calcitriol 0.25 mcg + Calcium Carbonate 500 mg + zinc 7.5 mg **Softgel Capsule**

Calcitriol : Increase calcium absorption. Better suppression of PTH than alfacalcidol. Manages hypocalcaemia in patient undergoing dialysis for chronic renal failure.

Calcium carbonate : Most important nutrient reducing risk of osteoporosis. Offers better bioavailability.

Magnesium : Reduces risk of osteoporosis.

Zinc : Stimulates cell proliferation & mineralization in osteoblast, promoting bone formation. Plays an important role in the regulation of bone metabolism.

In:

Pregnancy & Lactation

Renal Osteodystrophy

Senile Osteoporosis

Hypoparathyroidism
