

Information For the User
Cefuroxime (1000mg) + Sulbactam (500mg)

Cefuzrom S 1.5 Injection

Brand Name: Cefuzrom S 1.5 Injection

Dosage Form: Injection

Composition:

Each vial contains:

Cefuroxime Sodium I.P. 1000 mg

Sulbactam Sodium I.P. 500 mg

Therapeutic Segment:

Antibiotic / Anti-Infective Segment

Therapeutic Indication:

Indicated for the treatment of:

- Respiratory tract infections (bronchitis, pneumonia)
- Urinary tract infections (UTIs)
- Skin and soft tissue infections
- Bone and joint infections
- Intra-abdominal infections
- Gynecological infections
- Septicemia and postoperative infections

It helps in **eliminating bacterial infections** by combining a potent cephalosporin antibiotic with a β -lactamase inhibitor for enhanced efficacy against resistant bacteria.

Mechanism of Action:

- **Cefuroxime** is a second-generation cephalosporin that inhibits bacterial cell wall synthesis, leading to cell lysis and death.
- **Sulbactam** is a β -lactamase inhibitor that prevents bacterial enzymes from deactivating cefuroxime, thereby broadening its antibacterial spectrum.

Dosage & Administration:

- Administer intramuscularly (IM) or intravenously (IV) as directed by the physician.
- Usual adult dose: 1.5 g every 8 to 12 hours depending on infection severity.
- Reconstitute the vial with sterile water for injection before use.
- Adjust dosage in renal impairment as required.

Contraindications:

- Hypersensitivity to cephalosporins, penicillins, or β -lactam antibiotics.

Warnings & Precautions:

- Use with caution in patients with renal or hepatic dysfunction.
- Prolonged use may cause overgrowth of non-susceptible organisms.
- Monitor for signs of allergic reactions or diarrhea due to possible *C. difficile* infection.

Side Effects:

- Common: Pain at injection site, nausea, diarrhea, rash.
- Rare: Hypersensitivity reactions, eosinophilia, or transient liver enzyme elevation.

Storage:

Store below 25°C in a cool, dry place.

Protect from light and moisture.

Use immediately after reconstitution.

Packaging:

Cefuzrom S 1.5 Injection is available as a sterile vial with suitable diluent.

Schedule:

Schedule H1 Drug – To be sold by retail on the prescription of a Registered Medical Practitioner only.
