

## To Get Perfect Grip Over The Infection....

# Cefzlan

  
T a b l e t s

Cefixime Trihydrate I.P. 200mg + Ofloxacin  
I.P. 200mg Tablets

- This combination provides a wide range of antibacterial activity, effective against various bacterial strains.
- It's used to treat infections like urinary tract infections (UTIs), respiratory tract infections, and certain sexually transmitted infections (STIs).
- The combination of cefixime (a cephalosporin) and ofloxacin (a fluoroquinolone) works synergistically to combat bacterial growth.
- This combination is used in the treatment of typhoid fever.

### Indication In :
