

**A Combination That Assures
Safety Against Infection.....**

CafoliTM
L I F E C A R E

CefzlanTM **CV**

Cefixime Trihydrate I.P. 200mg +
Potassium Clavulanate I.P. 125mg Tablets

- This combination is effective against a wide range of bacteria, making it useful for treating various infections.
- Clavulanate is added to cefixime to overcome bacterial resistance. It inhibits beta-lactamase enzymes, which some bacteria produce to inactivate antibiotics.
- The inclusion of clavulanate allows cefixime to work more effectively against bacteria that would otherwise be resistant to it.

Indication In :

Respiratory tract infections

Urinary tract infections (UTIs)

Ear infections (Otitis media)

Throat infections

Also Available

CefzlanTM **CV**
