

No More Peptic Ulcers

PanpitalTM HP Kit

Amoxicillin (750mg) + Pantoprazole (40mg) +
Clarithromycin (500mg) **Tablets**

Amoxicillin :

- Amoxicillin is an antibiotic which kills bacteria by preventing the formation of the bacteria protective covering.

Clarithromycin :

- Clarithromycin is also an antibiotic which stops bacteria from growing by preventing the synthesis of essential proteins necessary for their survival.

Pantoprazole :

- Pantoprazole is a proton pump inhibitor (PPI) which reduces the amount of acid in the stomach and relieves acid-related indigestion

Indications

Intestinal Ulcer

Acute Hyperacidity Syndrome

Peptic Ulcer

Duodenal & Gastric Ulcer
