

# Clomidile A150 Tablet

## Clomidile A150 Tablet

### Composition:

Each film-coated tablet contains:

- **Clopidogrel Bisulphate IP** eq. to Clopidogrel – 75mg
- **Aspirin IP** – 150mg
- **Excipients** – q.s.

### Description:

Clomidile A150 Tablet is used for the **prevention of heart attacks, strokes, and other cardiovascular complications** in high-risk patients. It works by **inhibiting platelet aggregation and preventing clot formation**, ensuring smooth blood flow in arteries.

### Indications:

- Acute Coronary Syndrome (ACS)
- Prevention of **ischemic stroke and transient ischemic attack (TIA)**
- Peripheral Artery Disease (PAD)
- Post-percutaneous coronary intervention (PCI) and stenting

### Dosage & Administration:

- One tablet **once daily** or as prescribed by the physician.
- Take with **food** to minimize gastric irritation.

### Contraindications:

- **Active gastrointestinal bleeding or peptic ulcer disease**
- **Severe hepatic impairment**
- **Hypersensitivity to Clopidogrel, Aspirin, or NSAIDs**

### Warnings & Precautions:

- Use cautiously in patients with **bleeding disorders**.
- Monitor for signs of **excessive bleeding**.
- Avoid alcohol and **concurrent NSAID use** to prevent gastric irritation.

### Adverse Reactions:

- **Gastrointestinal issues** (nausea, dyspepsia, gastric ulcers)
- **Increased bleeding tendency** (easy bruising, nosebleeds)
- **Allergic reactions** (rash, itching)

**Storage:**

- Store below **30°C**, in a **dry and cool place**, away from moisture and sunlight.
- Keep out of reach of **children**.
