TinyBud™

## Critsal™

**Critsal 0.31**

Levosalbutamol (0.31mg) Respule

**Critsal 0.63**

Levosalbutamol (0.63mg) Respule

**Critsal 1.25**

Levosalbutamol (1.25mg) + Ipratropium (500mcg) Respule

- Used for the treatment of chronic respiratory conditions like asthma and COPD.
- Helps relax and open the airways for easier breathing.
- Reduces symptoms such as wheezing, coughing, and chest tightness.
- Delivered via nebulization or inhalation for direct lung action.
- Provides both quick relief and improved airflow with combined bronchodilator effect.

ASTHMA

Chronic Bronchitis

COPD

Emphysema
