

# Defziff Oral Suspension

Here's a product description for Deflazacort 6mg/5ml Suspension:

---

## Deflazacort 6mg/5ml Suspension

Deflazacort 6mg/5ml Suspension is a corticosteroid medication used to treat a variety of inflammatory and autoimmune conditions, as well as certain types of allergies. With its potent anti-inflammatory and immunosuppressive effects, this medication is formulated to help reduce inflammation, alleviate symptoms, and improve quality of life for patients managing conditions like rheumatoid arthritis, certain types of dermatitis, and muscle weakness associated with specific diseases.

Each 5 ml of the suspension contains 6mg of Deflazacort, offering precise dosing for ease of administration, particularly in pediatric and adult patients who may require a liquid form for easier consumption.

### Key Features:

- **Effective Anti-inflammatory Action:** Helps reduce swelling, redness, and pain associated with various inflammatory conditions.
- **Dosing Flexibility:** Available in a liquid form, making it suitable for patients who have difficulty swallowing tablets or need precise adjustments to their dosage.
- **Broad Application:** Used for managing conditions like allergies, asthma, autoimmune diseases, and certain forms of muscle weakness.

### Benefits:

- Reduces symptoms of inflammation and immune system responses
- Easy-to-administer liquid suspension
- Can be used for both adults and children (under medical supervision)
- Suitable for short- and long-term treatment plans based on the physician's recommendation

**How to Use:** Shake the bottle well before each use. The recommended dosage will vary depending on the condition being treated, the patient's age, and the physician's instructions. Always follow your healthcare provider's guidance on the correct dose and schedule.

### Important Information:

- Always take as prescribed and do not adjust the dosage without consulting your doctor.
- Prolonged use may require periodic medical checkups to monitor for potential side effects.
- Not suitable for individuals with certain health conditions, such as active infections or those with a history of steroid sensitivity.
