

For Acute Inflammatory And Allergic Disorders....

Defziff™

Tablets

Deflazacort

Deflazacort 6mg Tablets

- Deflazacort Is A Corticosteroid With Anti-inflammatory And Immunosuppressive Effects, Commonly Used For Conditions Like Allergic Reactions, Asthma, And Autoimmune Diseases.
- When Formulated Into A Gel, It Can Be Beneficial For Localized Application, Providing Relief For Itching And Inflammation Directly On The Skin.
- Deflazacort Gel Is Often Recommended For Short-term Use In Targeted Areas, Helping To Minimize Systemic Absorption And Associated Side Effects.
