

# Esoable Fast 40 Tablet

## Esoable Fast 40 Tablet – Esomeprazole with Sodium Bicarbonate for Acid Reflux & GERD

### Composition:

Each **Esoable Fast 40 Tablet** contains:

- **Esomeprazole 40 mg** – A **proton pump inhibitor (PPI)** that reduces stomach acid production.
- **Sodium Bicarbonate Buffer** – Helps **neutralize acid quickly** and protects Esomeprazole from stomach degradation for enhanced absorption.

### Description:

**Esoable Fast 40 Tablet** is a **rapid-action acid suppressant** used for the treatment of **gastroesophageal reflux disease (GERD)**, **peptic ulcers**, and **hyperacidity disorders**. The combination of **Esomeprazole** and **Sodium Bicarbonate** provides **fast and effective relief** from heartburn, acid reflux, and stomach irritation.

### Pharmacological Action:

- **Esomeprazole inhibits gastric acid secretion** by blocking the proton pump in stomach lining cells.
- **Sodium Bicarbonate neutralizes stomach acid**, providing **immediate symptom relief** and protecting Esomeprazole from premature breakdown.
- Improves healing of **acid-related damage** to the esophagus and stomach lining.

### Indications:

**Esoable Fast 40 Tablet** is used for:

- **Gastroesophageal Reflux Disease (GERD)** and **acid reflux**.
- **Peptic and duodenal ulcers**.
- **Erosive esophagitis**.
- **Zollinger-Ellison Syndrome** (excessive acid production).
- **Helicobacter pylori eradication therapy (as part of combination treatment)**.

### Dosage & Administration:

- **Recommended Dose:** One tablet daily **before meals**, or as prescribed by a doctor.
- **Do not crush or chew;** swallow whole with water.
- **Duration of treatment** depends on the severity of symptoms.

### Contraindications:

- **Hypersensitivity to Esomeprazole, Sodium Bicarbonate, or any PPI.**

- Severe kidney disease or metabolic alkalosis.
- Hypocalcemia or sodium-restricted diet (use caution due to Sodium Bicarbonate content).

### Warnings & Precautions:

- **Long-term use** may lead to **Vitamin B12 deficiency and bone loss**.
- May increase the risk of **Clostridium difficile infection** in the intestines.
- **Pregnant and breastfeeding women** should use under medical supervision.
- **Avoid alcohol and NSAIDs**, as they can worsen acidity.

### Adverse Effects:

Esomeprazole is generally well-tolerated, but may cause:

- **Headache, nausea, or abdominal pain.**
- **Flatulence, constipation, or diarrhea.**
- **Rare cases of allergic reactions** (rash, swelling, difficulty breathing).

### Drug Interactions:

- **May reduce absorption of certain drugs**, including **antifungals (Ketoconazole)** and **iron supplements**.
- **Avoid combining with Clopidogrel**, as it may reduce its effectiveness.
- **May increase blood levels of Digoxin, Warfarin, and Diazepam** – monitor if taking these medications.

### Storage Conditions:

- Store at **room temperature (below 30°C)** in a **dry place**.
- Protect from **moisture and direct sunlight**.
- Keep out of reach of **children**.

### Conclusion:

**Esoable Fast 40 Tablet** is a **highly effective acid-reducing medication** that offers **fast relief from heartburn, GERD, and acid-related disorders**. Its **buffered formula ensures better absorption and protection of the stomach lining**, making it a **preferred choice** for long-term acid control.
