disturbs the whole identity*

Flufenol

Flufenol M Flupenthixol (0.5mg) + Melitracen (10mg)

Flufenol 0.5 Flupenthixol 0.5mg

✓ **Flupenthixol Dihydrochloride**

- Antipsychotic and anxiolytic drug.
- Effective drug for somatoform disorders, irritable bowel syndrome (IBS) & psychosomatic disorders.
- Effective in management of primary and secondary symptoms of psychotic disorders.
- Well tolerated compared to nortipylone in neurotic depression.

✓ **Melitracen Hydrochloride**

Blocks the respective brain receptors to control psychotic illness.

Melitracen combined with flupenthixol is effective in the management of trigeminal neuralgia.

A bipolar thymoleptic with activating properties in low doses
