

Information For the User
Fluoxetine (20mg) Capsule

Flicktine 20 Capsule

Flicktine 20 Capsule

Dosage Form: Capsule

Composition:

Each hard gelatin capsule contains:
Fluoxetine Hydrochloride I.P. equivalent to Fluoxetine 20 mg

Description:

Flicktine 20 Capsule contains Fluoxetine, a selective serotonin reuptake inhibitor (SSRI) used in the management of depressive and anxiety-related disorders. It works by increasing serotonin levels in the brain, helping improve mood, emotional balance, sleep patterns, and overall mental well-being.

Indications:

Major depressive disorder
Obsessive compulsive disorder (OCD)
Panic disorder
Bulimia nervosa
Premenstrual dysphoric disorder (PMDD)

Dosage & Administration:

Dosage should be taken as directed by the physician.
Capsule should be swallowed whole with water, with or without food.

Pharmacological Action:

Fluoxetine selectively inhibits the reuptake of serotonin in the central nervous system, thereby increasing serotonergic neurotransmission. This action helps stabilize mood, reduce anxiety, and improve psychological functioning.

Side Effects:

Nausea
Insomnia
Headache
Loss of appetite
Dry mouth
Nervousness

Precautions & Warnings:

Use under medical supervision only.
Avoid sudden discontinuation without medical advice.
Use cautiously in patients with liver disorders or seizure history.
Not recommended with monoamine oxidase inhibitors (MAOIs).

Drug Interactions:

May interact with MAO inhibitors, antipsychotics, anticoagulants, and other serotonergic drugs.
Consult physician before concomitant use with other medications.

Storage:

Store below 25°C in a dry place.
Protect from light and moisture.
Keep out of reach of children.
