

Information For the User
Formoterol (6mcg) + Fluticasone Propionate (125mcg) Inhaler

Flutialfa F 125 Inhaler

Brand Name: Flutialfa F 125 Inhaler

Dosage Form: Metered-Dose Inhaler (MDI)

Composition:

Each actuation contains:

Formoterol Fumarate 6 mcg

Fluticasone Propionate 125 mcg

Therapeutic Segment:

Respiratory Care / Anti-Asthmatic Segment

Therapeutic Indication:

Indicated for the treatment and maintenance of asthma and chronic obstructive pulmonary disease (COPD).

It helps in controlling airway inflammation, reducing bronchial hyperreactivity, and preventing symptoms like wheezing, shortness of breath, and cough.

Mechanism of Action:

- **Formoterol** is a long-acting β_2 -adrenergic agonist (LABA) that relaxes bronchial smooth muscles, producing prolonged bronchodilation.
- **Fluticasone Propionate** is an inhaled corticosteroid that suppresses airway inflammation, reduces mucosal swelling, and prevents asthma exacerbations.
- The combination provides both rapid symptom relief and long-term control of respiratory symptoms.

Dosage & Administration:

- Usually, 1–2 inhalations twice daily or as prescribed by the physician.
- Shake the inhaler well before each use.
- Inhale deeply and hold breath for 5–10 seconds after actuation.
- Rinse mouth with water after use to prevent oral thrush.

Contraindications:

- Hypersensitivity to Formoterol, Fluticasone, or any component of the inhaler.
- Not for relief of acute bronchospasm or sudden asthma attacks.

Warnings & Precautions:

- Use with caution in patients with cardiovascular disorders, diabetes, or thyroid disease.
- Do not exceed the recommended dose.
- Monitor asthma control regularly; adjust therapy under medical supervision.

Side Effects:

- Common: Throat irritation, hoarseness, cough, headache, tremor, palpitations.
- Rare: Oral candidiasis, paradoxical bronchospasm, hypersensitivity reactions.

Storage:

Store below 30°C in a cool, dry place.

Protect from heat, sunlight, and moisture.

Keep the cap tightly closed after each use.

Packaging:

Flutialfa F 125 Inhaler is available as a metered-dose canister delivering 120 actuations.

Schedule:

Schedule H1 Drug – To be sold by retail on the prescription of a Registered Medical Practitioner only.
