

Information For the User

Formoterol (6mcg) + Fluticasone Propionate (250mcg)

# Flutialfa F 250 Inhaler

## Formoterol (6 mcg) + Fluticasone Propionate (250 mcg) Inhaler

### Description:

This combination inhaler contains **Formoterol**, a long-acting beta-agonist (LABA), and **Fluticasone Propionate**, a corticosteroid. It is used for the management and prevention of respiratory conditions such as asthma and chronic obstructive pulmonary disease (COPD), offering bronchodilation and anti-inflammatory effects.

### Composition:

Each metered dose contains:

- **Formoterol Fumarate:** 6 mcg
- **Fluticasone Propionate:** 250 mcg

**Excipients:** q.s.

### Indications:

- Maintenance treatment of **asthma** in adults and adolescents (12 years and older).
- Treatment of **COPD**, including chronic bronchitis and emphysema, to reduce symptoms and exacerbations.

### Dosage and Administration:

- **Asthma:** 1 inhalation twice daily (morning and evening) or as directed by the physician.
- **COPD:** 1 inhalation twice daily or as prescribed.
- Rinse the mouth with water after use to reduce the risk of oral thrush.

### Contraindications:

- Hypersensitivity to Formoterol, Fluticasone, or any component of the inhaler.
- Not for use in the treatment of acute bronchospasm or status asthmaticus.

### Warnings and Precautions:

- **Asthma-related death:** LABAs may increase the risk of asthma-related deaths. Use only as part of a combination therapy with corticosteroids.
- Regular monitoring is necessary for adrenal suppression or systemic corticosteroid effects in long-term use.
- Use with caution in patients with cardiovascular disorders, diabetes, or thyroid dysfunction.
- Avoid abrupt discontinuation. Gradual tapering may be required.
- Not recommended for use in children under 12 years.

### Side Effects:

- Common: Hoarseness, throat irritation, dry mouth, or headache.
- Less common: Oral thrush, palpitations, muscle cramps, or tremors.
- Rare: Hypersensitivity reactions (rash, swelling, or difficulty breathing).

### Storage:

- Store below **30°C (86°F)**.
- Keep the inhaler away from direct sunlight and heat.
- Keep out of reach of children.

### Note:

This inhaler is a **maintenance medication** and

should not be used as a rescue inhaler during acute asthma attacks. Always follow the prescribed dosage and consult your healthcare provider for guidance.
