

Salmeterol (25mcg) + Fluticasone Propionate (250mcg)

Flutialfa S 250 Inhaler

Salmeterol (25 mcg) + Fluticasone Propionate (250 mcg) Inhaler

Description:

This combination inhaler contains Salmeterol, a long-acting beta-agonist (LABA), and Fluticasone Propionate, a corticosteroid. It is used for the maintenance treatment of asthma and chronic obstructive pulmonary disease (COPD), providing long-term bronchodilation and anti-inflammatory action.

Composition:

Each metered dose contains:

- Salmeterol Xinafoate: Equivalent to 25 mcg of Salmeterol
- Fluticasone Propionate: 250 mcg

Excipients: q.s.

Indications:

- Maintenance treatment of persistent asthma in adults and adolescents (12 years and older).
- Management of symptoms and prevention of exacerbations in COPD, including chronic bronchitis and emphysema.

Dosage and Administration:

- Asthma and COPD:
 - 1 inhalation twice daily (morning and evening) or as directed by the physician.
- Rinse the mouth with water after each use to reduce the risk of oral thrush.

Note:

This inhaler is not intended for acute relief of bronchospasm. Use a short-acting bronchodilator (rescue inhaler) for sudden symptoms.

Contraindications:

- Hypersensitivity to Salmeterol, Fluticasone Propionate, or any component of the inhaler.
- Not for use in the treatment of acute bronchospasm or status asthmaticus.

Warnings and Precautions:

- Asthma-related death: LABAs may increase the risk of asthma-related deaths if not used with an appropriate corticosteroid. Always use as a combination therapy.
- Regular monitoring is necessary for systemic corticosteroid effects, such as adrenal suppression or reduced bone mineral density, with long-term use.
- Use with caution in patients with cardiovascular disease, diabetes, thyroid disorders, or a history of seizures.
- Avoid abrupt discontinuation; tapering may be required under medical supervision.

Side Effects:

- Common: Headache, hoarseness, throat irritation, or tremors.
- Less common: Oral thrush, palpitations, or muscle cramps.

- **Rare: Hypersensitivity reactions, paradoxical bronchospasm, or pneumonia (in COPD patients).**
-

Storage:

- **Store at a temperature below 30°C (86°F).**
 - **Keep the inhaler away from direct sunlight and heat.**
 - **Keep out of reach of children.**
-

Note:

This inhaler is a maintenance medication and should be used regularly as prescribed. It is not a substitute for a rescue inhaler in acute situations. Always consult your healthcare provider for appropriate usage.
