

Gluthasil C

Gluthasil C Injection

Dosage Form: Injection

Therapeutic Segment: Antioxidant / Skin & Detox Support

Composition:

Each vial contains:

- Glutathione 600 mg
- Vitamin C I.P. 500 mg
- Water for Injection q.s.

Description:

Glutathione is a potent intracellular antioxidant that protects cellular components from oxidative stress. Vitamin C enhances the regeneration and stability of Glutathione, supports immune function, and provides additional antioxidant protection.

Indications:

- Adjunctive therapy in oxidative stress and detoxification
- Skin rejuvenation and dermal lightening
- Liver support in hepatotoxicity
- Adjuvant in chemotherapy/radiotherapy-induced toxicity
- Supportive therapy in chronic fatigue and immune disorders

Dosage and Administration:

- Dosage as directed by the physician
- Administered slowly via intravenous route
- Suitable for use under medical supervision only

Contraindications:

- Known hypersensitivity to Glutathione or Vitamin C
- Caution in patients with renal impairment or oxalate nephropathy

Warnings and Precautions:

- Should be used under supervision of qualified healthcare professionals
- Monitor renal function during high-dose administration
- Not intended for use in pregnancy or lactation unless prescribed
- Avoid rapid IV injection to reduce risk of adverse reactions

Adverse Effects:

- Nausea, vomiting

- Flushing or dizziness during administration
- Rare allergic reactions
- Transient increase in liver enzymes

Storage:

- Store below 25°C
- Protect from light
- Do not freeze
- Keep out of reach of children

Presentation:

- Vial containing lyophilized Glutathione with separate ampoule of Vitamin C solvent (or combined preparation depending on packaging)

Conclusion:

Gluthasil C Injection offers a dual antioxidant approach with Glutathione and Vitamin C, beneficial in detoxification, immune support, and cosmetic dermatology indications.
