

Glycopryl 25

Glycopyrronium Inhalation Solution 25mcg/2ml **Respules**

- A long-acting muscarinic antagonists (LAMAS).
- Shows fast onset of action, sustained 24-hour bronchodilatation and improvement in exercise tolerance.
- Significantly improves exertional dyspnea and reduces breathlessness.
- Provides immediate relief from early morning symptoms, which are considered by patients to be the most problematic.
- Achieves significantly better lungs function than placebo, as measured by the forced expiratory volume(FEV1) one second in patients with moderate-to-severe COPD.
