

Information For the User
Glycopyrronium (25mcg) + Formoterol (12mcg)+
Budesonide (400 mcg)

Glycopryl FB

Glycopryl FB Dry Powder Capsule for Inhalation (Rotacaps)

Composition:

Each capsule contains:

- **Glycopyrronium 25 mcg**
- **Formoterol 12 mcg**
- **Budesonide 400 mcg**

Description:

Glycopryl FB is a **triple-combination inhalation therapy** designed for the **management of chronic respiratory diseases** such as **COPD (Chronic Obstructive Pulmonary Disease) and Asthma**. It contains:

- **Glycopyrronium** (a long-acting muscarinic antagonist - LAMA) that helps in **bronchodilation**.
- **Formoterol** (a long-acting beta-agonist - LABA) that works to **relax airway muscles** for easier breathing.
- **Budesonide** (a corticosteroid) that **reduces inflammation** and prevents asthma and COPD flare-ups.

Indications:

- **Chronic Obstructive Pulmonary Disease (COPD)**
- **Moderate to severe Asthma**
- **Chronic bronchitis and emphysema management**

Dosage & Administration:

- **Use one capsule daily** or as prescribed by a healthcare professional.
- Capsule should be used **only with a Rotahaler/ DPI device**.
- **Do not swallow the capsule**.

Contraindications:

- **Hypersensitivity** to Glycopyrronium, Formoterol, or Budesonide.
- **Acute asthma or COPD exacerbations** (not for emergency use).

Warnings & Precautions:

- **Not a rescue medication** for sudden breathing problems.
- May cause **oral thrush**, so rinse mouth after use.
- Use with caution in **patients with cardiovascular disorders**.
- Consult a doctor if pregnant or breastfeeding.

Side Effects:

- Mild throat irritation or cough
- Headache or dizziness
- Increased heart rate (tachycardia) (rare)
- Dry mouth or hoarseness

Storage Instructions:

- Store in a **cool, dry place** away from moisture.
- **Keep out of reach of children.**
