

Information For the User  
Glycopyrronium IP 25 mcg Respule

# Glycopyrl 25 Respule

Glycopyrl 25 Respule

**Dosage Form:** Respule (Inhalation Solution)

**Composition:**

Each respule contains:

Glycopyrronium Bromide I.P. 25 mcg

**Description:**

Glycopyrl 25 Respule contains Glycopyrronium, a long-acting anticholinergic bronchodilator used for the management of chronic obstructive pulmonary disease (COPD) and other respiratory conditions. It works by relaxing the smooth muscles of the airways, leading to bronchodilation and improved airflow. The respule is used with a nebulizer to deliver the medication directly into the lungs for rapid and effective relief.

**Indications:**

Chronic obstructive pulmonary disease (COPD)

Chronic bronchitis

Emphysema

Maintenance therapy for airflow obstruction

**Dosage & Administration:**

Dosage should be used as directed by the physician.

Administer via a nebulizer for inhalation.

Follow proper nebulization technique for effective delivery of the medication.

**Pharmacological Action:**

Glycopyrronium is a long-acting muscarinic receptor antagonist that blocks M3 receptors in the airway smooth muscles. This results in prolonged bronchodilation, reduced airway resistance, and improved breathing capacity in patients with obstructive airway diseases.

**Side Effects:**

Dry mouth

Throat irritation

Cough

Headache

Rare allergic reactions

**Precautions & Warnings:**

Use under medical supervision only.

Use cautiously in patients with glaucoma or urinary retention.

Not intended for acute bronchospasm relief.

**Drug Interactions:**

May interact with other anticholinergic medications.

Consult physician before using with other inhaled medicines.

**Storage:**

Store below 25°C in a dry place.

Protect from light and moisture.

Keep out of reach of children.

Manufactured in India for:

**Cafoli Lifecare Pvt. Ltd.**

**(An ISO 9001: 2015 Certified Co.)**
