

THE COMPREHENSIVE LIVER SPILLED THERAPY

Hepalogy

Hepalogy-XT Tablets

Silymarin, L-Ornithine, L-Glutathione, N-Acetyl Cysteine, Co-Q10, Inositol Antioxidants & Micronutrients Tablets

Hepalogy B Syrup

Silymarin + L-Ornithine + L-Aspartate + Tricholine Citrate & Vitamin B-Complex Syrup

Hepalogy Granules

L-Ornithine L-Aspartate 3gm Sachet

Hepalogy-L Infusion

L-Ornithine L-Aspartate 5gm/10ml Infusion

- Adenosine is investigated for its role in the liver due to steatohepatitis (Fatty Liver) being associated with reduced rates of the one-carbon cycle and subsequent methylation in the liver.
- In patients with cirrhosis of the liver Adenosine daily was able to reduce the rate of liver transplantation or death from cirrhosis from 29% to 12% more benefit was noted in persons with less pathology of cirrhosis compared to late-stage cirrhosi
- A substantial amount of evidence suggested that Adenosine can be effective treatment of Osteoarthritis, the wear and tear type of arthritis that many people develop as they get older

Cholestasis

Osteoarthritis

Hepatotoxicity

Alcoholic Liver Disease
