

In Acute & Chronic

Liver Disorder...

Hepalogy-L

L-Ornithine L-Aspartate (5gm) Infusion

INJECTION

- L-Ornithine-L-Aspartate improves the neuropsychiatric status and it decreases the serum levels of ammonia with lower incidences of adverse effects (less than 2%) in the treatment of clinical encephatopathy in patients with liver failure.
- L-Ornithine-L-Aspartate significantly improves MHE (Minimal hepatic encephalopathy) and HRQOL (health-related quality of life) in patients with chronic liver disease.

In.

Reduces Hyperammonemia,
a most important evidence of
effective treatment
