

Way to Relief From Acidity....

Lanzotyle

Lanzotyle 15 Tablets *Lansoprazole Orally Disintegrating Tablets 15 mg.*

Lanzotyle 30 Tablets *Lansoprazole Orally Disintegrating Tablets 30 mg.*

- ▶ Lansoprazole 30/15 mg tablet is a medication used to reduce stomach acid production. It is commonly prescribed to treat conditions such as gastroesophageal reflux disease (GERD), peptic ulcers, and Zollinger-Ellison syndrome.
- ▶ The tablet works by inhibiting the proton pump in the stomach lining, thereby decreasing acid secretion. Lansoprazole 30/15 mg tablets are typically taken orally, often before meals, to provide effective acid control and symptom relief.
