

# Lubicom Eye Drop

## Lubicom Eye Drop

### Composition:

Each ml contains:

- **Carboxymethylcellulose** – 0.5% w/v

### Description:

**Lubicom Eye Drop** is an ophthalmic lubricant used to relieve **dry eyes, irritation, and discomfort** caused by environmental factors, prolonged screen exposure, or reduced tear production.

Carboxymethylcellulose is a **hydrating agent** that helps retain moisture on the ocular surface, providing long-lasting relief from **dry eye syndrome**.

### Pharmacological Action:

- Forms a **protective film** over the eye, reducing tear evaporation.
- Lubricates and **hydrates the corneal surface**, improving tear stability.
- Soothes **burning, itching, and irritation** caused by dryness.

### Indications:

**Lubicom Eye Drop** is used for:

- **Dry eye syndrome (keratoconjunctivitis sicca)**
- **Eye strain due to prolonged screen time or environmental factors**
- **Post-surgical eye care**
- **Temporary relief of irritation, burning, or discomfort caused by wind, smoke, or air pollution**

### Dosage & Administration:

- **Usual Dose: 1–2 drops** in the affected eye(s) as needed or as directed by a physician.
- Tilt the head back, pull down the lower eyelid, and instill the drops.
- Do not **touch the dropper tip** to avoid contamination.
- Wait at least **5–10 minutes** before using other eye medications.

### Contraindications:

- **Hypersensitivity** to Carboxymethylcellulose or any excipients.
- Avoid use if the **solution changes color or becomes cloudy**.

### Warnings & Precautions:

- For **ophthalmic use only**; do not ingest.

- May cause **temporary blurred vision**; avoid driving immediately after application.
- Remove **contact lenses** before use and wait **at least 15 minutes** before reinsertion.
- If **redness, irritation, or worsening symptoms persist**, consult a doctor.

#### Adverse Effects:

- **Common:** Temporary **blurred vision, mild stinging, or irritation** after application.
- **Rare:** Allergic reactions like **eye redness, swelling, or excessive tearing**.

#### Drug Interactions:

- No significant drug interactions, but use other **ophthalmic medications at least 5 minutes apart**.

#### Storage Conditions:

- Store at **room temperature (below 25°C)**, away from direct light and heat.
- Do not **freeze**.
- Keep out of reach of children.

#### Conclusion:

**Lubicom Eye Drop** is an effective **artificial tear** formulation that provides **long-lasting relief from dry eyes and irritation**. Its **moisturizing action** ensures ocular comfort and protection, making it a preferred choice for managing **dry eye syndrome and environmental eye strain**.
