

Information For the User  
Carboxymethylcellulose (1% w/v) + Oxychloro Complex  
(0.0075% w/v) Eye Drops

# Lubicom Plus Eye Drops

**Brand Name:** Lubicom Plus Eye Drop

**Dosage Form:** Eye Drops

**Composition:**

Each ml contains:

- Carboxymethylcellulose Sodium IP 1% w/v
  - Oxychloro Complex 0.0075% w/v
  - Aqueous base q.s.
- 

**Description:**

Lubicom Plus Eye Drop is a sterile ophthalmic formulation containing Carboxymethylcellulose, a lubricating agent, and Oxychloro Complex, a preservative system designed for ocular safety. It is indicated for the management of dry eye conditions and ocular surface irritation. It helps in providing prolonged lubrication, stabilizing the tear film, and protecting the ocular surface from dryness and environmental stress.

---

**Indications:**

Indicated for the management of:

- Dry eye syndrome (keratoconjunctivitis sicca)
- Ocular irritation due to environmental factors (dust, smoke, prolonged screen exposure)
- Post-operative ocular dryness

It helps in relieving burning, irritation, and discomfort associated with inadequate tear production.

---

**Dosage & Administration:**

Instill 1–2 drops in the affected eye(s) or as directed by the physician.

Avoid touching the dropper tip to any surface to prevent contamination.

If using other ophthalmic medications, maintain an interval of at least 5–10 minutes between applications.

---

**Pharmacological Action:**

- **Carboxymethylcellulose Sodium** acts as a tear substitute by increasing viscosity and retaining moisture on the ocular surface, thereby enhancing tear film stability.
- **Oxychloro Complex** serves as a preservative that breaks down into natural tear components upon instillation, ensuring antimicrobial protection with minimal ocular toxicity.

Together, these components help in maintaining ocular hydration and comfort.

---

**Side Effects:**

Generally well tolerated.

Transient burning, stinging, or blurred vision may occur upon instillation.

Rarely, hypersensitivity reactions or ocular irritation may be observed.

---

**Precautions & Warnings:**

- For ophthalmic use only
  - Do not use if the solution changes color or becomes cloudy
  - Use with caution in patients with known hypersensitivity to any component
  - Contact lenses should be removed prior to instillation and may be reinserted after 15 minutes
  - Discontinue use if irritation persists or worsens
- 

**Drug Interactions:**

No significant drug interactions reported.

However, concomitant use with other ophthalmic preparations should be spaced appropriately to avoid dilution effects.

---

**Storage:**

Store below 25°C in a cool, dry place.

Protect from light.

Keep the bottle tightly closed after use.

Keep out of reach of children.

Manufactured in India for:

**Cafoli Lifecare Pvt. Ltd.**
