

Information For the User  
Mefenamic Acid (100mg/5ml) Suspension

# Mefasil 100 Suspension

Mefasil 100 Suspension

**Dosage Form:** Oral Suspension

**Composition:**

Each 5 ml contains:

Mefenamic Acid I.P. 100 mg

**Description:**

Mefasil 100 Suspension contains Mefenamic Acid, a non-steroidal anti-inflammatory drug (NSAID) used for the relief of mild to moderate pain, inflammation, and fever. It works by inhibiting the synthesis of prostaglandins, the chemical substances responsible for pain and inflammation in the body. The suspension form is particularly suitable for pediatric use, providing effective relief from fever and pain in children.

**Indications:**

Fever management

Mild to moderate pain

Inflammatory conditions

Dental pain

Pain associated with infections in children

**Dosage & Administration:**

Dosage should be taken as directed by the physician.

The suspension should be shaken well before use and measured with a proper measuring device.

It is preferably taken after meals to minimize gastric discomfort.

**Pharmacological Action:**

Mefenamic Acid inhibits cyclooxygenase (COX) enzymes involved in prostaglandin synthesis. By reducing prostaglandin production, it helps relieve pain, decrease inflammation, and reduce fever.

**Side Effects:**

Nausea

Abdominal discomfort

Diarrhea

Dizziness

Rare allergic reactions

**Precautions & Warnings:**

Use under medical supervision only.

Use cautiously in patients with gastrointestinal disorders, renal impairment, or hypersensitivity to NSAIDs.

Avoid prolonged use without medical advice.

**Drug Interactions:**

May interact with other NSAIDs, anticoagulants, corticosteroids, and certain antihypertensive medications.

Consult physician before using with other medicines.

**Storage:**

Store below 25°C in a dry place.

Protect from light.

Keep out of reach of children.

Manufactured in India for:

**Cafoli Lifecare Pvt. Ltd.**
