

Micals Dusting Powder

Micals Dusting Powder

Composition:

Each **Micals Dusting Powder** contains:

- **Miconazole Nitrate – 2% w/w**

Description:

Micals Dusting Powder is an **antifungal powder** used for the **prevention and treatment of fungal skin infections**, including athlete's foot, ringworm, and candidiasis. **Miconazole Nitrate** works by inhibiting the growth of **fungi and yeast**, reducing **itching, redness, and irritation**.

Pharmacological Action:

- **Miconazole Nitrate (2% w/w):**
 - A broad-spectrum **antifungal agent** that disrupts fungal cell membranes.
 - Effective against **dermatophytes, yeast, and other fungi**.
 - Helps **absorb excess moisture**, keeping the skin dry and infection-free.

Indications:

Micals Dusting Powder is recommended for:

- **Fungal skin infections** (Tinea corporis, Tinea cruris, Tinea pedis, etc.)
- **Athlete's foot, jock itch, and ringworm**
- **Candidiasis and yeast infections**
- **Sweat-related fungal infections**
- **Prevention of skin rashes and irritation in humid conditions**

Dosage & Administration:

- Apply **2-3 times daily** or as directed by a physician.
- Clean and dry the affected area before applying.
- Sprinkle a **thin layer** over the affected area.
- Can be used **inside socks, shoes, and undergarments** for fungal prevention.
- **For external use only.**

Contraindications:

- Hypersensitivity to **Miconazole or any excipients**.
- Avoid **use on open wounds or broken skin**.

Warnings & Precautions:

- **Avoid inhalation**, as it may cause respiratory irritation.
- **Do not apply near eyes, nose, or mouth.**
- **Discontinue use if irritation or allergic reaction occurs.**
- **Consult a doctor before use in children and pregnant women.**

Adverse Effects:

- **Mild skin irritation, redness, or itching** (rare).
- **Allergic reactions** (very rare).

Storage Conditions:

- Store in a **cool, dry place below 30°C.**
- Keep away from **direct sunlight and moisture.**
- **Keep out of reach of children.**

Conclusion:

Micals Dusting Powder provides **effective antifungal protection**, keeping the skin **dry, irritation-free, and healthy**. It is ideal for daily use, particularly in **humid conditions**, to prevent **fungal infections and excessive sweating-related discomfort**.
