

Modagen 100 Tablets

Composition:

Each uncoated tablet contains:

Modafinil – 100 mg

Excipients – q.s.

Description:

Modagen 100 Tablet contains Modafinil, a wakefulness-promoting agent used primarily to treat excessive daytime sleepiness associated with narcolepsy, obstructive sleep apnea (OSA), and shift work sleep disorder (SWSD). It improves alertness by acting on the central nervous system and enhancing wakefulness without the side effects commonly associated with traditional stimulants.

Indications:

Narcolepsy with excessive daytime sleepiness

Obstructive Sleep Apnea (OSA)—associated residual sleepiness

Shift Work Sleep Disorder (SWSD)

Off-label use in ADHD, chronic fatigue syndrome (only under physician supervision)

Mechanism of Action:

Modafinil is thought to work by increasing the levels of neurotransmitters like dopamine, norepinephrine, and histamine in the brain. It promotes wakefulness by acting on the hypothalamus and other brain regions involved in the sleep–wake cycle, enhancing alertness and reducing fatigue.

Dosage and Administration:

Usual adult dose: 100–200 mg once daily, preferably in the morning or one hour before the start of a work shift.

Dosage should be adjusted based on therapeutic response and patient tolerance.

To be taken orally with or without food.

Side Effects:

Headache, nausea, nervousness

Insomnia or sleep disturbances

Dizziness or anxiety in some cases

Rarely, skin reactions or elevated liver enzymes

Precautions:

Use cautiously in patients with cardiovascular disease, hypertension, or hepatic impairment

Not recommended during pregnancy or lactation unless essential

Avoid alcohol or sedatives while on Modafinil

May impair the effectiveness of hormonal contraceptives—alternative methods are advised

Storage:

Store in a cool, dry place below 25°C
Protect from direct sunlight and moisture
Keep out of reach of children
