

Brings The Glow
Of Beauty Back

Metaniff

Metaniff
Cream

Mometasone I.P. 0.1% w/w **Cream**

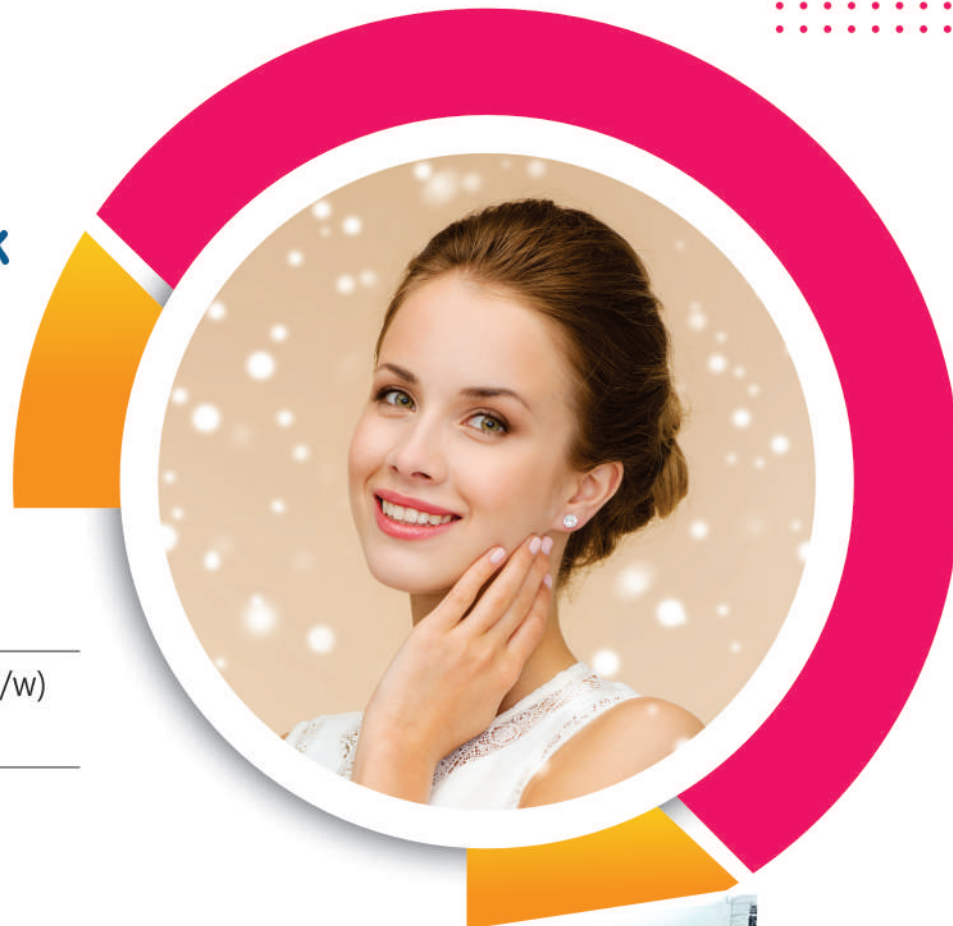

Metaniff-HT
Cream

Hydroquinone (2% w/w) + Mometasone (0.1% w/w)
+ Tretinoin (0.025% w/w) **Cream**

Metaniff
Nasal Spray

Mometasone (50mcg) **Nasal Spray**

- Hydroquinone directly inhibit tyrosinase activity, the key determinant of melanin production in skin.
- Tretinoin increases cellular epidermal turnover, which leads to pigment dispersion.
- Mometasone reduce inflammation as a side effect of both hydroquinone & tretinoin but also inhibits melanocyte metabolism.
- Mometasone furoate is used topically to reduce inflammation of the skin.
- It activates secretion of anti-inflammatory proteins. Restore normal structure & function of skin

**LIGHTEN SKIN FRECKLES | NASAL POLYPS
DERMATITIS | ACNE**
