

Information For the User
Oxymetazoline (0.025% w/v)

Oxyniff P Nasal Drop

Composition:

Each ml contains:

Oxymetazoline Hydrochloride I.P. – 0.025% w/v

In an aqueous isotonic base – q.s.

Description:

Oxyniff P Nasal Drop contains Oxymetazoline, a direct-acting sympathomimetic agent with vasoconstrictor properties. It is used intranasally to provide rapid and long-lasting relief from nasal congestion. Specially formulated for pediatric use, it is effective in conditions like rhinitis, sinusitis, and the common cold. The decongestant action begins within minutes and may last up to 12 hours.

Indications:

Nasal congestion due to common cold or allergic rhinitis
Acute or chronic sinusitis
Upper respiratory tract infections causing nasal obstruction
Pediatric nasal blockage and breathing difficulty

Mechanism of Action:

Oxymetazoline stimulates alpha-adrenergic receptors in the arterioles of the nasal mucosa, leading to vasoconstriction. This reduces blood flow and swelling in the nasal passages, resulting in decongestion and improved airflow.

Dosage and Administration:

Children (6–12 years): 2–3 drops in each nostril twice daily

Children (2–6 years): 1–2 drops in each nostril twice daily or as directed by the physician

Not to be used for more than 3 consecutive days

Tilt head back slightly and instill drops gently. Do not exceed recommended dosage

Side Effects:

Transient burning or stinging sensation
Dryness of nasal mucosa
Rebound congestion on prolonged use
Rare: Sneezing, headache, or restlessness

Precautions:

For pediatric use only under medical supervision
Avoid long-term or frequent use to prevent rebound congestion
Use with caution in children with cardiovascular disorders, thyroid disease, or diabetes
Discontinue use if irritation or nasal dryness persists

Storage:

Store below 25°C in a cool and dry place
Protect from direct light and contamination

Keep out of reach of children
Close the cap tightly after each use
