

Ostosite DM Tablet

Diacerein (50mg) + Glucosamine Sulfate Potassium Chloride (750mg) + Methyl Sulfonyl Methane (250mg) Tablet: Information Guide

Description

This combination tablet is designed to support joint health and alleviate symptoms of osteoarthritis. It combines Diacerein, an anti-inflammatory agent that slows cartilage degeneration, Glucosamine Sulfate, which promotes cartilage repair, and Methyl Sulfonyl Methane (MSM), known for its anti-inflammatory and pain-relieving properties.

Composition

- **Diacerein: 50mg**
- **Glucosamine Sulfate Potassium Chloride: 750mg**
- **Methyl Sulfonyl Methane (MSM): 250mg**
- **Dosage Form: Oral tablet**

Mechanism of Action

1. **Diacerein: Inhibits interleukin-1 (IL-1), a key contributor to cartilage breakdown in osteoarthritis, reducing inflammation and delaying disease progression.**
2. **Glucosamine Sulfate: A building block for cartilage, it helps repair damaged cartilage and improve joint lubrication.**
3. **MSM: Reduces joint pain and inflammation, while enhancing collagen formation for better joint integrity.**

Indications

This combination is indicated for:

- **Osteoarthritis and other degenerative joint conditions.**
- **Relieving joint pain, stiffness, and swelling.**
- **Supporting cartilage repair and improving joint mobility.**

Dosage and Administration

- **Recommended Dose: 1 tablet twice daily or as directed by a healthcare professional.**
- **Route: Oral, to be taken with meals for better absorption.**

Contraindications

- **Hypersensitivity to any of the ingredients.**
- **Severe liver or kidney impairment.**
- **Pregnant or breastfeeding women (consult a healthcare provider before use).**

Warnings and Precautions

- **Use with caution in patients with diabetes; monitor blood sugar levels as glucosamine may affect glucose metabolism.**
- **Avoid use in patients with severe hepatic disorders or those at risk of developing gastrointestinal side effects.**
- **Not suitable for children unless prescribed by a doctor.**

Adverse Effects

- **Common:** Mild gastrointestinal discomfort, diarrhea, or nausea.
 - **Rare:** Allergic reactions like rash or itching, or changes in liver enzymes (due to Diacerein).
-

Storage

- Store in a cool, dry place below 25°C.
 - Protect from light and moisture.
 - Keep out of reach of children.
-

Key Benefits

1. **Joint Pain Relief:** Reduces inflammation and discomfort associated with osteoarthritis.
 2. **Cartilage Support:** Promotes cartilage regeneration and joint lubrication, slowing disease progression.
 3. **Improved Mobility:** Reduces stiffness, enabling better joint flexibility and movement.
-

Note: This medication is to be used under the guidance of a healthcare professional. It is not a cure for osteoarthritis but helps manage its symptoms and improve quality of life. Always follow the prescribed dosage and inform your doctor of any side effects or concerns.
