

Information For the User
EPantoprazole 40mg + Domperidone 30mg

Pantype DSR

Pantype DSR Capsule

Composition: Pantoprazole 40mg + Domperidone 30mg

Introduction

Pantype DSR Capsule is a **combination medicine** used for the **treatment of acid reflux, gastroesophageal reflux disease (GERD), and acidity-related disorders**. It effectively reduces **stomach acid production**, prevents **nausea and vomiting**, and promotes **better digestion**.

Key Benefits

- **Reduces Acid Reflux & Heartburn** – Provides relief from GERD and acid-related conditions.
- **Prevents Nausea & Vomiting** – Domperidone helps control nausea and improves gastric motility.
- **Protects the Stomach Lining** – Reduces the risk of ulcers caused by excessive acid secretion.
- **Promotes Better Digestion** – Enhances gastric emptying and prevents bloating.

Indications & Uses

- **Gastroesophageal reflux disease (GERD)**
- **Hyperacidity & Acid Reflux**
- **Peptic Ulcers & Gastric Disorders**
- **Indigestion, Nausea & Vomiting**

Dosage & Administration

- Take **one capsule daily** or as prescribed by a healthcare professional.
- Preferably **taken before meals** for maximum effectiveness.

Precautions & Storage

- **Not recommended for long-term use** without medical supervision.
- **Avoid alcohol & spicy foods** to prevent acid aggravation.
- Store in a **cool, dry place**, away from direct sunlight.

Conclusion

Pantype DSR Capsule is a **highly effective treatment** for **acid reflux, GERD, and nausea**, offering **long-lasting relief** from gastric discomfort. It **ensures better digestion, reduces acidity, and improves overall gut health**.
