

Relieve The **Constipation** & **Relax The Bowel**

Pegtyle

Potassium Chloride (0.0466gm) + Sodium Chloride (0.3507gm) +
Sodium Bicarbonate (0.1785gm) + Polyethylene Glycol (13.125gm)

Solution

Polyethylene glycol

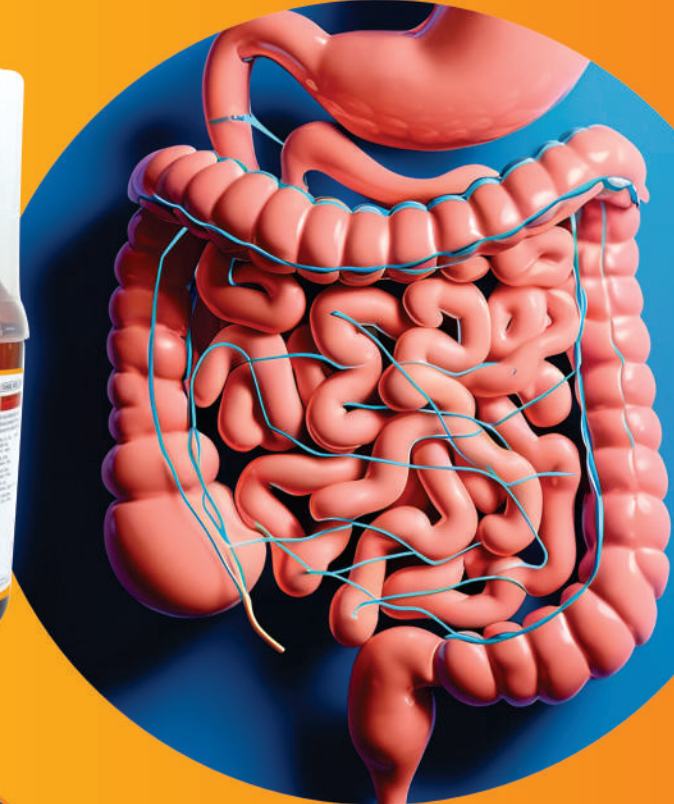

- ✓ Used to treat occasional constipation.
- ✓ A class of medications called osmotic laxatives.
- ✓ It works by causing water to be retained with the stool.
- ✓ Increases the number of bowel movements & softens the stool.

Sodium chloride

- ✓ An electrolyte replenisher to help prevent heat cramps caused by too much sweating

Sodium Bicarbonate

- ✓ Relieve heartburn, Sour stomach or acid indigestion by neutralizing excess stomach acid

IN

Incomplete Elimination of Bowel

Irritate Bowel Syndrome

Acute/Chronic Constipation

Drugs Induced Constipation
