

Permitime Cream

Permethrin B.P. 50mg Cream

Effective Topical Treatment for Lice and Scabies

Product Overview:

Permethrin B.P. 50mg Cream is a trusted and effective treatment for scabies and lice infestations. Containing **Permethrin**, a powerful antiparasitic agent, this cream works by eliminating mites, lice, and their eggs, providing rapid relief from itching, irritation, and other symptoms associated with parasitic infestations. Suitable for use in adults and children above two months of age (under medical supervision), this cream offers a targeted solution with minimal side effects.

Key Features:

- **Broad-Spectrum Action:** Effective against lice (*Pediculus humanus*), mites (*Sarcoptes scabiei*), and their eggs.
- **Dermatologist-Approved:** Recommended by healthcare professionals for scabies and lice treatment.
- **Convenient Formulation:** Easy-to-apply cream for localized and comprehensive treatment.
- **Gentle on Skin:** Non-irritating formula suitable for sensitive skin.
- **Rapid Relief:** Provides quick action against parasites while soothing itching and discomfort.

Indications:

1. **Scabies:** Treatment of scabies infestation caused by *Sarcoptes scabiei*.
2. **Lice Infestations:**
 - Head lice
 - Body lice
 - Pubic lice (crabs)

How It Works:

Permethrin acts by interfering with the nervous system of lice and mites. It disrupts the sodium ion channels in their nerve cells, causing paralysis and death. Additionally, it destroys eggs to break the infestation cycle, ensuring complete eradication of the parasites.

Usage Instructions:

For Scabies:

1. Wash the entire body thoroughly and allow the skin to dry.
2. Apply a thin layer of the cream to the entire body, including the neck, hands, soles of the feet, and under nails (pay special attention to folds and creases). Avoid the face and mucous membranes.
3. Leave the cream on for **8–14 hours**, preferably overnight.
4. Wash off the cream with soap and water the next morning.
5. Reapply only if prescribed by a healthcare professional.

For Lice (Head, Body, or Pubic Lice):

1. Wash the affected area with soap and water.
2. Dry the skin or scalp thoroughly.
3. Apply the cream to the affected area, ensuring complete coverage.
4. Leave the cream on for **10 minutes**.
5. Rinse thoroughly with water and dry with a clean towel.
6. Use a fine-toothed lice comb to remove dead lice and nits.

Note: Repeat treatment only as directed by a healthcare provider.

Precautions:

- Avoid contact with **eyes, nose, mouth**, and other mucous membranes. If accidental contact occurs, rinse immediately with water.
- Do not use on broken, inflamed, or severely irritated skin.
- For **external use only**. Do not ingest.
- Use with caution in individuals with a known hypersensitivity to Permethrin, other pyrethroids, or pyrethrins.
- If irritation or rash develops, discontinue use and consult a physician.

Side Effects:

Permethrin B.P. 50mg Cream is generally well-tolerated. However, some individuals may experience mild side effects, including:

- Temporary burning, stinging, or itching at the application site.
- Erythema (redness) or skin rash.
- Tingling or numbness (rare).

If severe or persistent side effects occur, seek medical attention.

Storage Instructions:

- Store in a cool, dry place below **25°C (77°F)**.
- Keep away from direct sunlight and excessive heat.
- Keep out of reach of children.

Additional Guidelines:

1. **Hygiene Measures:**
 - Wash bedding, towels, clothing, and other personal items in **hot water** to kill mites, lice, and eggs.
 - Avoid sharing personal items to prevent reinfestation.
2. **Treatment of Close Contacts:**
 - Scabies and lice are highly contagious. All household members or close contacts should be examined and

treated simultaneously to avoid reinfestation.

3. **Post-Treatment Care:**

- Itching may persist for a few days after treatment due to dead mites and their waste products. This is normal and does not indicate treatment failure

Why Choose Permethrin B.P. 50mg Cream?

1. **Fast-Acting Relief:** Begins killing lice and mites on contact.
2. **Comprehensive Solution:** Eradicates both parasites and their eggs.
3. **Proven Efficacy:** Trusted by healthcare professionals for scabies and lice treatment.
4. **Gentle on Skin:** Specially formulated to minimize irritation during treatment.

Consult Your Doctor If:

- Symptoms persist or worsen after treatment.
- Signs of reinfestation appear, such as itching, redness, or visible lice.
- Severe side effects occur.

Note for Healthcare Professionals:

Permethrin B.P. 50mg Cream is an ideal first-line treatment for parasitic infestations. It can be prescribed as a part of a comprehensive care plan for individual patients or outbreaks in close-contact environments such as schools, dormitories, or care facilities.
