

Information For the User
Rabiprazole 20mg + Domperidone 30mg

Ribtype DSR

Ribtype DSR Capsule

Composition: Rabeprazole 20mg + Domperidone 30mg

Introduction

Ribtype DSR Capsule is a **dual-action medication** designed to provide **relief from acid reflux, gastroesophageal reflux disease (GERD), and other acidity-related disorders**. Rabeprazole is a **proton pump inhibitor (PPI)** that reduces **stomach acid production**, while Domperidone enhances **gastric motility** and prevents **nausea, vomiting, and bloating**.

Key Benefits

- **Effective Acid Control** – Reduces excessive acid production and prevents heartburn.
- **Prevents Nausea & Vomiting** – Controls symptoms caused by acid reflux and indigestion.
- **Improves Digestion** – Promotes faster gastric emptying and reduces bloating.
- **Protects the Stomach Lining** – Helps in healing ulcers and prevents acidity-related discomfort.

Indications & Uses

- **Gastroesophageal reflux disease (GERD)**
- **Acid Reflux & Heartburn**
- **Peptic Ulcers & Gastric Disorders**
- **Indigestion, Nausea & Bloating**

Dosage & Administration

- Take **one capsule daily** or as directed by a healthcare professional.
- Best taken **before meals** for maximum effectiveness.

Precautions & Storage

- **Not recommended for long-term use** without medical advice.
- Avoid **alcohol, smoking, and spicy foods** to prevent acid aggravation.
- Store in a **cool, dry place**, away from direct sunlight.

Conclusion

Ribtype DSR Capsule is an **effective solution for acid reflux, GERD, and gastric discomfort**. It ensures **long-lasting relief, improves digestion, and supports overall gut health**.
