

Ribziff 20 Tablet

Rabeprazole (20mg) Tablet

Product Description

Rabeprazole (20mg) Tablet is a proton pump inhibitor (PPI) used to reduce the production of stomach acid. It is highly effective in treating acid-related gastrointestinal conditions such as gastritis, gastroesophageal reflux disease (GERD), peptic ulcers, and Zollinger-Ellison syndrome. This medication offers fast symptom relief and promotes healing of the esophageal and gastric lining.

Composition

- **Active Ingredient: Rabeprazole Sodium – 20mg.**
-

Mechanism of Action

Rabeprazole works by:

- **Inhibiting the H⁺/K⁺ ATPase enzyme (proton pump) in the stomach lining.**
 - **This action reduces acid production, allowing ulcers to heal and preventing further acid-related damage.**
-

Indications

Rabeprazole 20mg is prescribed for:

1. **Gastroesophageal Reflux Disease (GERD): Relief from heartburn and acid regurgitation.**
2. **Peptic Ulcers: Heals ulcers in the stomach and duodenum.**

3. **Erosive Esophagitis: Treats inflammation and erosion of the esophagus.**
 4. **Zollinger-Ellison Syndrome: Controls excess acid production.**
 5. **H. pylori Infection (as part of triple therapy): Combined with antibiotics to eradicate H. pylori bacteria.**
-

Dosage and Administration

- **Usual Dose: 20mg once daily before meals.**
 - **Duration: Typically 4–8 weeks, depending on the condition being treated.**
 - **Swallow the tablet whole with water; do not crush or chew.**
-

Benefits

1. **Provides rapid and long-lasting relief from acid-related symptoms.**
 2. **Promotes healing of ulcers and esophageal damage.**
 3. **Reduces the risk of ulcer recurrence in H. pylori infections (when used with antibiotics).**
-

Side Effects

Most side effects are mild and temporary. Common side effects include:

- **Headache.**
- **Nausea or vomiting.**
- **Diarrhea or constipation.**
- **Flatulence or abdominal pain.**

Rare but severe side effects:

- **Allergic reactions (rash, swelling).**

- Severe diarrhea (Clostridium difficile infection).
- Low magnesium levels (leading to muscle cramps, irregular heartbeat).

healing process. It should be used under the guidance of a healthcare professional to ensure safety and effectiveness.

Precautions and Warnings

- **Pregnancy and Breastfeeding:** Use only if clearly needed; consult a healthcare provider.
- **Kidney/Liver Disease:** Use with caution in patients with severe liver conditions.
- **Drug Interactions:**
 - May reduce the absorption of certain drugs requiring stomach acid (e.g., ketoconazole, atazanavir).
 - Can interact with anticoagulants like warfarin, increasing bleeding risk.
- **Prolonged Use:** Long-term use may lead to vitamin B12 deficiency or increased fracture risk.

Storage Instructions

- Store in a cool, dry place at a temperature below 25°C.
- Protect from moisture and sunlight.
- Keep out of reach of children.

Presentation

- **Form:** Enteric-coated tablet.
- **Strength:** 20mg Rabeprazole Sodium.
- **Packaging:** Typically available in blister packs of 10 or 15 tablets.

Conclusion

Rabeprazole 20mg Tablet is a highly effective treatment for managing acid-related disorders, offering rapid symptom relief and enhancing the
