

Rosutyle C 10 Tablet

Rosutyle C 10 Tablet

(Rosuvastatin 10 mg + Clopidogrel 75 mg Tablet)

Composition:

Each film-coated tablet contains:

- **Rosuvastatin I.P.** – 10 mg
- **Clopidogrel I.P.** – 75 mg

Description:

Rosutyle C 10 Tablet is a **combination therapy** that integrates **Rosuvastatin (a statin)** and **Clopidogrel (an antiplatelet agent)** to provide **cardiovascular protection**. It is used for **cholesterol management and to prevent blood clot-related complications** such as **heart attacks and strokes** in high-risk individuals.

Pharmacological Action:

- **Rosuvastatin (10 mg) - Statin:**
 - Lowers **LDL (bad cholesterol)** and increases **HDL (good cholesterol)**
 - Prevents **plaque buildup** in arteries
 - Reduces the risk of **atherosclerosis**
- **Clopidogrel (75 mg) - Antiplatelet Agent:**
 - Prevents **platelet aggregation**
 - Reduces **blood clot formation**
 - Helps in the prevention of **cardiovascular events**

Indications:

Rosutyle C 10 Tablet is recommended for:

- ✓ **Prevention of heart attacks & strokes** in high-risk patients
- ✓ **Management of dyslipidemia & cardiovascular diseases**
- ✓ **Coronary artery disease (CAD) & atherosclerosis**
- ✓ **Post-cardiac interventions (angioplasty, stenting, CABG)**
- ✓ **Peripheral artery disease (PAD)**

Dosage & Administration:

- 💊 **Recommended Dose:** One tablet daily or as per the physician's advice.
- ★ Take with **water after meals** to reduce gastric irritation.
- ✗ **Do not crush, break, or chew** the tablet.

Contraindications:

- ⊗ Active bleeding disorders (e.g., peptic ulcers, hemorrhagic stroke)
- ⊗ Severe liver or kidney disease
- ⊗ Hypersensitivity to Rosuvastatin or Clopidogrel
- ⊗ Pregnancy & lactation (consult a doctor before use)

Warnings & Precautions:

- ⚠ Liver function monitoring is required (LFTs)
- ⚠ Increased bleeding risk - Use cautiously before surgeries
- ⚠ Risk of muscle toxicity (Myopathy) - Report any muscle pain
- ⚠ Avoid alcohol & excessive consumption of grapefruit juice

Side Effects:

- ✓ **Common:** Nausea, headache, dizziness, mild stomach discomfort
- ! **Serious:** Muscle pain (rhabdomyolysis), liver dysfunction, allergic reactions, increased bleeding tendencies

Drug Interactions:

- ⚡ **Anticoagulants (Warfarin, Heparin):** Higher risk of bleeding
- ⚡ **NSAIDs (Aspirin, Ibuprofen):** May interfere with Clopidogrel's function
- ⚡ **Other statins or fibrates:** Increased risk of muscle toxicity

Storage Conditions:

- ✓ Store below **30°C**, in a **cool & dry place**
- ✓ Keep away from **children & direct sunlight**

Conclusion:

Rosutyle C 10 Tablet is a **clinically effective cardiovascular therapy**, combining **cholesterol reduction (Rosuvastatin)** and **blood clot prevention (Clopidogrel)**. It is ideal for patients with **high cardiovascular risk**, ensuring long-term **heart health and stroke prevention**.
