

Information For the User  
Rosuvastatin 10mg + Clopidogrel 75mg Capsule

# Rosumore CV 10/75 Capsule

**Brand Name:** Rosumore CV 10-75 Capsule

**Composition:**

Each hard gelatin capsule contains:

Rosuvastatin Calcium IP eq. to Rosuvastatin – 10 mg

Clopidogrel Bisulphate IP eq. to Clopidogrel – 75 mg

Dosage Form: Capsule

**Description:**

Rosumore CV 10-75 Capsule is a fixed-dose combination of Rosuvastatin and Clopidogrel. Rosuvastatin is an HMG-CoA reductase inhibitor (statin) used for lowering cholesterol, while Clopidogrel is an antiplatelet agent that prevents blood clots. Together, they reduce the risk of heart attacks and strokes in patients with cardiovascular risk.

**Indications:**

Indicated for the prevention of cardiovascular events in patients with established atherosclerotic disease or multiple risk factors. It is used in the treatment of dyslipidemia, hypercholesterolemia, and post-myocardial infarction care.

**Mechanism of Action:**

Rosuvastatin works by inhibiting the enzyme HMG-CoA reductase, responsible for cholesterol synthesis in the liver, thereby reducing LDL and total cholesterol levels while increasing HDL. Clopidogrel is a P2Y<sub>12</sub> ADP receptor antagonist that irreversibly inhibits platelet aggregation, reducing the risk of thrombotic events.

**Dosage and Administration:**

Take as prescribed by the physician. Usually administered orally once daily, with or without food. Do not crush or chew the capsule.

**Side Effects:**

Common: Headache, muscle pain, dyspepsia, nausea, increased bleeding tendency

Rare: Rhabdomyolysis, liver enzyme abnormalities, thrombocytopenia

**Precautions:**

Use cautiously in patients with liver or kidney impairment, active bleeding disorders, or history of stroke. Regular monitoring of lipid levels and liver function is advised. Contraindicated in pregnancy, lactation, and hypersensitivity to either component.

**Storage:**

Store in a cool, dry place below 25°C. Protect from moisture and direct sunlight. Keep out of reach of children.
