

Rosumore ASP Capsule

Composition (per capsule):

- **Rosuvastatin Calcium** — 20 mg
- **Aspirin (Acetylsalicylic Acid, Enteric-Coated)** — 75 mg

Description:

Rosumore ASP Capsule is a fixed-dose combination of a statin (Rosuvastatin) and an antiplatelet agent (Aspirin), used to manage dyslipidemia and prevent cardiovascular events. It helps lower LDL cholesterol, reduce triglycerides, and inhibit platelet aggregation, thereby minimizing the risk of heart attack and stroke.

Indications:

- Dyslipidemia and hypercholesterolemia
- Prophylaxis of cardiovascular events (myocardial infarction, stroke) in high-risk patients
- Secondary prevention in patients with a history of coronary artery disease

Mechanism of Action:

- **Rosuvastatin** inhibits HMG-CoA reductase, reducing cholesterol synthesis in the liver and increasing LDL receptor activity for enhanced clearance of LDL cholesterol.
- **Aspirin** irreversibly inhibits cyclooxygenase-1 (COX-1), preventing thromboxane A₂ formation and thereby inhibiting platelet aggregation.

Dosage and Administration:

- One capsule daily or as directed by the physician
- To be taken with food to minimize gastrointestinal irritation

Contraindications:

- Active peptic ulcer or GI bleeding
- Hypersensitivity to statins or salicylates
- Severe liver or kidney dysfunction
- Bleeding disorders

Precautions:

- Monitor liver enzymes and lipid profile during therapy
- Use with caution in patients with asthma or history of GI ulcers
- Avoid concurrent use with other NSAIDs or anticoagulants unless prescribed

Side Effects:

- Headache, myalgia, constipation (with Rosuvastatin)

- Gastric irritation, heartburn, increased bleeding tendency (with Aspirin)
- Rare: Rhabdomyolysis, hepatotoxicity, gastrointestinal bleeding

Storage:

- Store below 30°C in a dry place
- Protect from moisture and sunlight
- Keep out of reach of children
