

Information For the User
Levosulpiride 75 mg Tablet

Lesutype 75 Tablet

Brand Name: Lesutype 75 Tablet

Dosage Form: Tablet

Composition:

Each film-coated tablet contains:
Levosulpiride 75 mg

Therapeutic Segment:

Gastrointestinal / Prokinetic & Antipsychotic Segment

Therapeutic Indication:

Indicated for the treatment of gastrointestinal motility disorders such as dyspepsia, bloating, gastroesophageal reflux disease (GERD), and irritable bowel syndrome (IBS).

It is also used in the management of anxiety, depression, and negative symptoms of schizophrenia.

It helps in improving gastric emptying and reducing symptoms of nausea, acidity, and abdominal discomfort.

Mechanism of Action:

- **Levosulpiride** is a selective dopamine D2 receptor antagonist.
- It enhances gastrointestinal motility by stimulating acetylcholine release and reduces dopamine-mediated inhibition of gut movement.
- In the central nervous system, it exerts antipsychotic and antidepressant effects by modulating dopamine transmission.

Dosage & Administration:

- **Usual Adult Dose:** One tablet once or twice daily before meals, or as directed by the physician.
- Swallow the tablet whole with water. Do not crush or chew.
- Duration of therapy depends on the severity of symptoms and medical advice.

Contraindications:

- Hypersensitivity to Levosulpiride or any component of the formulation.
- Epilepsy, manic states, or prolactin-dependent tumors.

Warnings & Precautions:

- Use with caution in patients with renal impairment, Parkinson's disease, or cardiovascular disorders.
- Long-term use may cause extrapyramidal symptoms or hyperprolactinemia.
- Avoid alcohol and other CNS depressants during treatment.

Side Effects:

- Common: Drowsiness, dizziness, restlessness, mild tremors.
- Rare: Galactorrhea, gynecomastia, or menstrual irregularities due to prolactin elevation.

Storage:

Store in a cool, dry place below 30°C.

Protect from moisture and direct sunlight.

Packaging:

Lesutype 75 Tablet is available in blister packs of 10 tablets.

Schedule:

Schedule H Drug – To be sold by retail on the prescription of a Registered Medical Practitioner only.
