

Information For the User
Cefepime (1gm) + Sulbactam (500mg)

Tillpime S 1.5 Injection

Brand Name: Tillpime S 1.5 Injection

Dosage Form: Injection

Composition:

Each vial contains:

Cefepime I.P. 1 g

Sulbactam Sodium I.P. 500 mg

Therapeutic Segment:

Antibiotic / Anti-Infective Segment

Therapeutic Indication:

Indicated for the treatment of:

- Severe respiratory tract infections including pneumonia and bronchitis
- Urinary tract infections (UTIs)
- Skin and soft tissue infections
- Intra-abdominal infections
- Gynecological infections
- Septicemia and other serious bacterial infections

It helps in **treating infections caused by both susceptible and β -lactamase producing bacteria**, providing broad-spectrum antibacterial coverage.

Mechanism of Action:

- **Cefepime** is a fourth-generation cephalosporin that inhibits bacterial cell wall synthesis by binding to penicillin-binding proteins, causing bacterial lysis.
- **Sulbactam** is a β -lactamase inhibitor that prevents bacterial enzymes from inactivating cefepime, enhancing its efficacy against resistant strains.

Dosage & Administration:

- Administer intravenously (IV) or intramuscularly (IM) as directed by the physician.
- Usual adult dose: 1.5 g every 8–12 hours depending on infection severity.
- Reconstitute the vial with sterile water for injection or suitable diluent before administration.
- Dose adjustment is required in patients with renal impairment.

Contraindications:

- Hypersensitivity to cephalosporins, penicillins, or β -lactam antibiotics.

Warnings & Precautions:

- Use with caution in patients with renal or hepatic impairment.
- Monitor for signs of superinfection or antibiotic-associated diarrhea.
- Allergic reactions, including anaphylaxis, may occur in sensitive individuals.

Side Effects:

- Common: Pain at injection site, nausea, diarrhea, rash.
- Rare: Hypersensitivity reactions, hematologic changes, transient liver enzyme elevation.

Storage:

Store below 25°C in a cool, dry place.

Protect from light and moisture.

Use immediately after reconstitution.

Packaging:

Tillpime S 1.5 Injection is available as a sterile vial with suitable diluent.

Schedule:

Schedule H1 Drug – To be sold by retail on the prescription of a Registered Medical Practitioner only.
