

Information For the User
Aceclofenac (100mg) + Paracetamol (325mg) + Tolperisone (150mg)

Tolprist MR Tablet

Tolprist MR Tablet

Dosage Form: Tablet

Therapeutic Category: Muscle Relaxant & Analgesic Combination

Composition (Each film-coated tablet contains):

- Aceclofenac – 100 mg
- Paracetamol – 325 mg
- Tolperisone Hydrochloride – 150 mg

Description:

Tolprist MR Tablet is a triple-action formulation combining a non-steroidal anti-inflammatory drug (Aceclofenac), an antipyretic analgesic (Paracetamol), and a centrally acting muscle relaxant (Tolperisone). This combination offers enhanced relief in musculoskeletal pain and spasms associated with inflammatory conditions.

Indications:

- Acute musculoskeletal pain
- Muscle spasms
- Low back pain
- Cervical or lumbar spondylosis
- Postoperative pain and inflammation

Dosage and Administration:

- One tablet twice daily or as directed by the physician.
- To be taken with or after food.

Contraindications:

- Known hypersensitivity to any of the active ingredients
- Severe hepatic or renal impairment
- History of gastrointestinal bleeding or peptic ulcers

Warnings and Precautions:

- Use with caution in patients with liver, kidney, or cardiac dysfunction
- Avoid alcohol consumption during treatment
- Not recommended during pregnancy and lactation unless prescribed by a physician

Adverse Effects:

- Nausea, dyspepsia, abdominal discomfort
- Dizziness or drowsiness

- Rarely, allergic skin reactions

Storage:

- Store below 25°C in a dry place
- Protect from light and moisture
- Keep out of reach of children

Conclusion:

Tolprist MR Tablet provides comprehensive relief from pain and muscle stiffness by targeting both inflammation and muscle spasms, ensuring better mobility and patient comfort.
