

Information For the User
Tiotropium (9mcg) Inhaler

Tioprime Inhaler

Brand Name: Tioprime Inhaler

Dosage Form: Inhaler

Composition: Tiotropium I.P. 9 mcg per actuation

Therapeutic Segment:
Respiratory Care / Bronchodilator Segment

Description:

Tioprime Inhaler contains **Tiotropium**, a long-acting anticholinergic bronchodilator that helps **relax and open the airways** in the lungs. It is primarily prescribed for the **maintenance treatment of chronic obstructive pulmonary disease (COPD)**, including chronic bronchitis and emphysema.

It helps in:

- Relieving **shortness of breath and wheezing**
- **Improving airflow** in the lungs
- Reducing the frequency of COPD exacerbations
- Maintaining easier and comfortable breathing over the long term

Mechanism of Action:

- **Tiotropium** blocks muscarinic receptors in the airways, leading to **bronchodilation** and decreased airway resistance.
- Provides **long-lasting relief** for up to 24 hours per dose.

Usage Direction:

- Inhale **once daily** as directed by the physician.
- Ensure proper technique for effective delivery.
- Do not use as a rescue inhaler for sudden breathing difficulties.

Storage:

Store below 30°C in a cool, dry place.

Keep out of reach of children.

Do not puncture or expose to fire.

Key Benefits:

- Long-acting bronchodilator for **maintenance therapy**
- Reduces COPD symptoms and improves **quality of life**
- Convenient **inhaler format** for daily use
